I'm a front-end oriented developer transitioning into fullstack development. I craft modern, responsive, and experience-driven web interfaces using Next.js, TypeScript, and Tailwind CSS. I've built multiple real-world projects from property websites to QR code tools that showcase clean UI, smooth animations, and thoughtful UX. Currently, I'm deepening my backend knowledge with API design, authentication, and database integration to build fullstack apps from end to end.

PROJECTS

QRQuick – QR Code Generator

Next.js, TypeScript, Tailwind CSS, Firebase

- Developed a responsive web tool to generate QR codes for URLs, text, contacts, WiFi, and more fully mobile-friendly.
- Integrated dynamic QR style customization and download functionality.
- Designed a modern and clean UI/UX to allow seamless sharing and interaction.

MoveiHub – Streaming Movie Platform

Next.js, TMDB API, Tailwind CSS, Framer Motion

- Built a responsive movie streaming site using The Movie Database (TMDB) API, complete with search and category filtering.
- Implemented smooth UI animations with Framer Motion for an engaging user experience.
- Focused on dark mode design, card-based layouts, and minimalistic interactions.

Sinopsis Blog – Film & Game Insight Blog

Next.js, Tailwind CSS, Notion API

- Created a blog style site to publish and organize film reviews using a custom Notion CMS integration.
- Developed a static site generation (SSG) flow for optimized blog performance and SEO.
- Ensured responsive design across devices with clean typography and layout.
